Vitaly Vasilchenko

Technical Support Specialist (L1–L2), fintech & crypto -> moving into infrastructure · Remote

qbwrkr@gmail.com | Telegram: @qbwrkr | GitHub: github.com/danarieel | Site: danarieel.github.io

PROFILE

Technical Support Specialist in fintech and web3 with a SOC background. Worked on transaction systems (deposits, withdrawals, conversions, API integrations) and resolved complex L2 incidents: stuck transactions, API errors, refunds.

Since April 2026 — career break, focused on pet projects: Linux (systemd, nginx, cron), Docker Compose, Bash automation. Looking for a remote junior role in infrastructure or technical operations, or an L2/ops support role with a path into infrastructure.

PROJECTS

bash-report 2026

Bash · awk · cron · github.com/danarieel/bash-report

- Script that summarizes an nginx access.log: request count, status codes, top URLs and IPs
- Runs on a schedule via cron and writes the report to a file

Home lab 2026

Linux · OpenWrt · Docker · LXC

- Flashed a home router with OpenWrt
- Ran apps in containers: LXC on Linux, Docker on Windows

EXPERIENCE

Technical Support Engineer (L1→L2) Mar 2025 – Apr 2026

Evercode Lab — Remote

- Handled a high volume of user and partner requests via Zendesk, Telegram, Slack within a strict SLA: 95–100% SLA compliance, initial diagnostics and escalation to L2/L3 and QA
- Investigated complex L2 incidents (stuck transactions, conversion errors, refunds, partner API failures): root-cause analysis via PostgreSQL, Grafana / Zabbix logs, and Postman; escalated to L3/dev with reproduction steps and log excerpts
- As L2: closed tasks escalated from L1; tracked external notices (deposit/withdrawal suspensions, maintenance) and assessed the impact on our service
- Proposed a refund rule for deposits missing the required identifier; it became the team standard
- Proposed categorizing Zendesk chats by request type; the team lead later rolled it out
- Worked with Legal & Compliance on AML-related cases; technical bridge between Dev, QA, Compliance, and Account Management

SOC Analyst (L1) Jun 2024 – Nov 2024

NII Spetsvuzavtomatika — Rostov-on-Don

- VM administration via VMware vSphere and SSH: server ping, health checks, process monitoring; network perimeter control
- Administered endpoint/email security and honeypot traps; network traffic analysis via Netflow, Wireshark, WAF
- Monitored and triaged security alerts; SIEM (two solutions)
- Onboarded and trained new team members on SOC tools and workflows

SKILLS

Database
SQL / PostgreSQL

API
REST / Postman

Monitoring
Grafana / Zabbix

Security
SIEM / WAF / Wireshark

Infrastructure
Linux (systemd, nginx, cron) / Docker Compose, LXC / VMware vSphere / SSH

Automation
Bash / Git / GitHub

Tools
Jira / Confluence / Zendesk / Slack / Blockchain Explorers

Domain
Fintech / Crypto / Web3

Languages
English: written C1 (with AI), written/spoken B1 without AI / Russian Native

EDUCATION

2020 – 2024
Applied Mathematics & CS (Incomplete)
Southern Federal University

COURSES

2024 · Codeby Academy
Incident Response

2023 · Stepik
Bash & System Administration

2023 · SFU Digital Dept
Linux Administration
