Vitaly Vasilchenko

Technical Support Specialist (L1–L2), fintech & crypto → moving into infrastructure · Remote

qbwrkr@gmail.com | Telegram: @qbwrkr | Site: danarieel.github.io

PROFILE

Technical Support Specialist in fintech and web3 with a SOC background. Handled complex L2 incidents on transaction systems: stuck transactions, API errors, refunds. Moving into infrastructure: Linux, virtualization, monitoring, automation. Looking for a remote L1/L2 or adjacent technical role with a path into infrastructure. Available as self-employed / contractor.

EXPERIENCE

Independent Practice 2026 – present

Home automation & self-study

– Flashed a home router with OpenWrt
– Migrated and analyzed personal film and music databases for personalization
– Set up a Trakt scrobbler: watch status syncs automatically
– Ran apps in containers: LXC on Linux, Docker on Windows
– Learning Linux, Bash, Python; infrastructure projects for GitHub in preparation

Technical Support Engineer (L1→L2) Mar 2025 – Apr 2026

Evercode Lab (ChangeNOW) — Remote

– Handled user and partner requests via Zendesk, Telegram, Slack (transactions, API questions)
– 30–50 requests per day, 80+ on peak days; worked within SLA: first response up to 3 min, follow-ups up to 10 min
– Initial diagnostics; escalated complex cases to L2/L3 and QA
– Collaborated with Legal & Compliance on AML-related cases
– Investigated complex L2 incidents: stuck transactions, conversion errors, refunds, partner API failures
– As L2: closed tasks escalated from L1; tracked exchange notices (deposit/withdrawal suspensions, maintenance) and assessed the impact on our service, since liquidity is sourced from exchanges
– Root-cause analysis via PostgreSQL, Grafana, Zabbix logs, and Postman
– Escalated to L3/dev with detailed reproduction steps and log excerpts
– Technical bridge between Dev, QA, Compliance, and Account Management
– Maintained knowledge base in Confluence; trained two team members
– Consistently kept KPI metrics at a high level
– Proposed a refund rule for deposits missing the required identifier (memo); it became the team standard
– Proposed categorizing Zendesk chats by request type; the team lead later rolled it out

SOC Analyst (L1) Jun 2024 – Nov 2024

NII Spetsvuzavtomatika — Rostov-on-Don

– VM administration via VMware vSphere / SSH; network perimeter monitoring
– Administered KAV, KSMG, and honeypot traps; network traffic analysis via Netflow, Wireshark, PTAF
– Monitored and triaged security alerts; SIEM: Wazuh, MaxPatrol SIEM, SearchInform
– Incident escalation and documentation in Jira, Confluence, Redmine
– Onboarded and trained new team members on SOC tools and workflows

SKILLS

Database
SQL / PostgreSQL

API
REST / Postman

Monitoring
Grafana / Zabbix

Security
Komrad / Wazuh / MaxPatrol / PTAF / Wireshark

Infrastructure
Linux / VMware vSphere / SSH / Containers

Tools
Jira / Confluence / Zendesk / Slack / Blockchain Explorers

Domain
Fintech / Crypto / Web3

Languages
English B2 / Russian Native

EDUCATION

2021 – 2024
Applied Mathematics & CS (Incomplete)
Southern Federal University

COURSES

2024 · Codeby Academy
Incident Response

2023 · Stepik
Bash & System Administration

2023 · SFU Digital Dept
Linux Administration
